January 2010

Our Endorsement of the Reid Jones Partnership

Over the past 10 years the Reid-Jones partnership has proven to be both competent and professional in all dealings with PPG. They are now our preferred and default civil consultants on a wide variety of projects both large and small at our Wigan facility.

Early in 2001 we completely rebuilt our 501 facility, Reid-Jones were selected as consultants to cover all civil and structural elements of the project. This major project involving both PPG USA and PPG Wigan engineering personnel and was carried out against very tight time scales and cost control, the work undertaken and supervised by Reid-Jones was to the highest standard and was the base on which our relationship with Reid-Jones has been built.

Reid-Jones has also worked with us on two major on-site oxygen generation projects and the design/construction of a specialist explosion resistant room and many other smaller projects.

In short we have come to rely on the Reid-Jones partnership to provide all our civil design and construction consultations, a partnership that we intend to continue.
